

Crimp Quality Solutions

RESOURCES FOR QUALITY TERMINAL CRIMP PROCESSING

Crimp Quality Solutions is a part of the WireProcess Specialties portfolio of solutions for processing wire assemblies. A quality terminal crimp is a critical part of a wire harness assembly. The crimp process itself combines several elements including material, equipment and personnel. Crimp Quality Solutions provides a full compliment of shop floor crimp validation and monitoring process tools as well as training and support services.

Quality Monitoring and Validation Technology

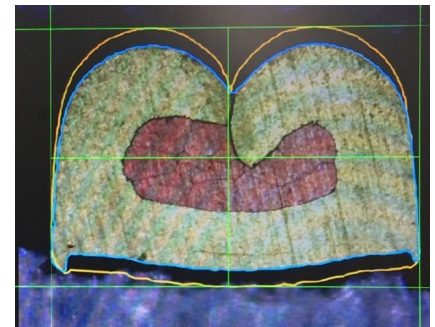

Validation

- Crimp Cross Section Systems
- Pull Testers
- Crimp Height Micrometers

Process Monitoring

- Crimp Force Monitors
- Network Integration

Consulting and Support Services

- Crimp Quality Systems Evaluation
- Crimp Cross Section Analysis
- Crimp Press Validation and Machine Capability.

Training

- Crimp Validation
- Crimp Process Monitoring
- In House or Webinar Based.

A great place to start is our free assessment. We evaluate your current crimp process and provide recommendations and the next steps. Our industry experts are available to assist in your training and quality validation tool requirements.

The first step is easy. Connect to www.crimpquality.solutions and click on the Let's Get Started link.
